

WHY WOULD A STRAWBERRY TEA BE BROWN?

Colors are associated with flavors, so give your customers what they expect! BioColor has developed a unique formula that has innovated the tea market. Our granulated natural colorants stay in the tea bag and diffuse into the water, without losing the powder in its pack. We challenge you to try it!

These are only a few examples of the solutions we can provide. For further details regarding these or other BioColor natural colorants, please contact us or our agent in your country. www.spbiogroup.com
